

# IP Input/Output Module

Valcom's Input/Output Module allows initiation of InformaCast Server events over an IP based network. The Input/Output module allows operation of eight (8) contact closures to trigger InformaCast events and eight (8) Form A relay outputs that provide for various programmable functions.

## Features & Advantages

Input/Output Module *InformaCast*..... VIP-848R-IC

### Relay Outputs

*Eight (8) Form A relay outputs.*

### Contact Inputs

*Eight (8) contact closure inputs.*

### Mounting

*Designed for 19" rack mounting.*
